Hemoglobin A1c Result

This blood test is a measure of the adequacy of your glucose control within the last three months. Your goal HgbA1c is less than 6.5%.

Last HgbA1c 12/8/04 HgbA1c (%) 6.4

Target LDL-C

Last LDL-C 12/8/04 LDL-C (mg/dl) 149

C metabolic panel normal except glucose 155

HDL 46 12/8/04

Your target LDL-cholesterol is <100.

Your LDL cholesterol does not meet our target level.

Your LDL cholesterol needs improvement.

I would suggest the following course of action to improve your results:

Start Lovastatin 20 mg every evening #30 refill x 1

We recommend a follow up fasting liver and lipid panel in 6 weeks.

Your HgbA1c is adequate. Keep up the good work!

I recommend repeating the HgbA1c blood test in 6 months.

Thank you for attention to this preventive health test.
